Subject: Lead from a new "lead-free" brass faucet? More common than you'd hope

Is this email not displaying correctly? [View it in your browser](#).

Hi, here's the latest from EDF Health:

[Lead from a new "lead-free" brass faucet? More common than you'd hope](#)

By Tom Neltner

Tom Neltner, J.D. is the Chemicals Policy Director and Lindsay McCormick is a Project Manager. During this past year, we undertook a pilot project to tackle the problem of lead in drinking water at child care facilities. As part of the effort, we collected 250 mL samples (about 8 ounces of water) from every drinking [...]
